

SMT-NB102B / SMT-NB102W

Touchless Exit Sensor

The **SMT-NB102B / W** is a high-reliability, touchless hand wave sensor designed for modern access control environments where hygiene, speed, and convenience are essential. This sensor-activated button allows users to trigger door unlocking with a simple wave of the hand, eliminating physical contact.

When connected to a compatible access control system and power supply, the SMT-NB102B / W ensures seamless and responsive operation.

Key Specifications

Touchless Activation: Hand wave sensor with adjustable detection range (5–8 cm)

Visual LED Feedback: Backlight shifts from blue to green upon successful activation

High Durability: Rated for over 100,000 activation cycles

Waterproof Design: IP68 rating for maximum environmental protection

Premium Build: Sleek, modern appearance with tempered glass panel and durable plastic housing

Model	SMT-NB102B / SMT-NB102W
Input Voltage	12–24 VDC
Max Current	50 mA
Output Terminals	NO / NC / COM
Sensing Range	5–8 cm
LED Indicator	Yes (Blue to Green)
Waterproof Rating	IP68
Material Tempered	Glass Panel + Plastic
Dimensions	86 × 86 × 11.5
Endurance Rating	100,000 operations
Operating Humidity	0–95% RH (non-condensing)

Dimensions (mm)
