

SMT-PS7012

Power Supply for Access Control System

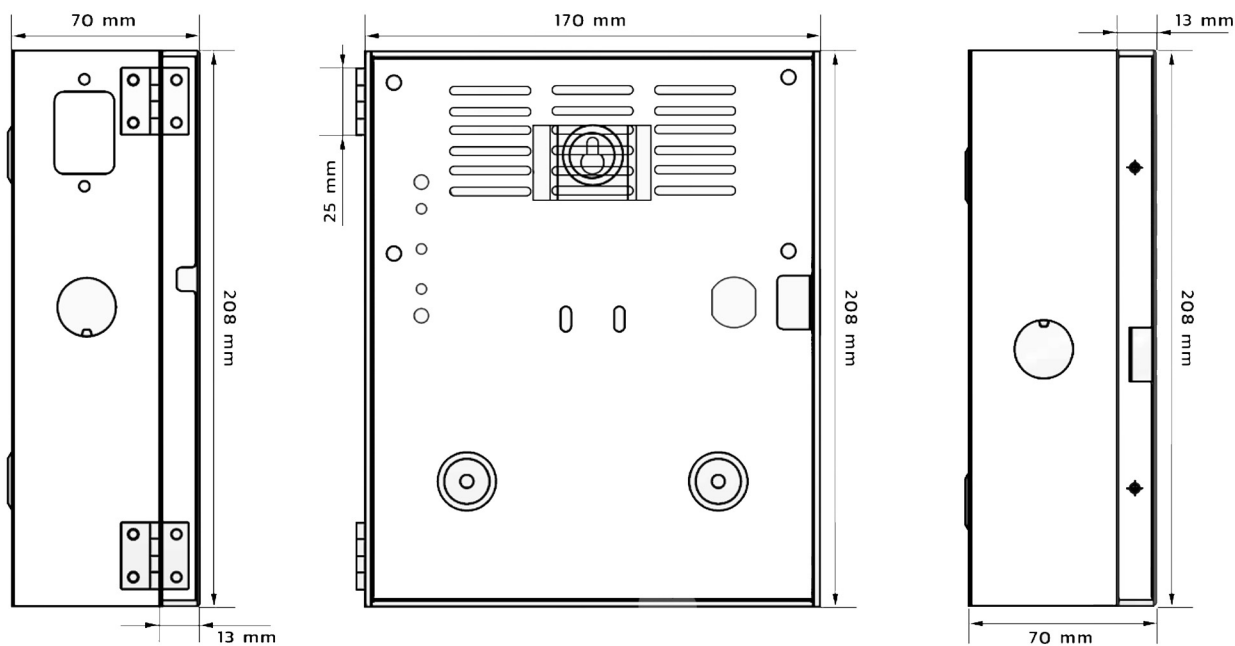

Key Features

- **High Reliability** : Engineered to provide consistent power delivery, minimizing downtime and ensuring your access control systems operate smoothly
- **Surge Protection** : Equipped with advanced surge protection to safeguard your systems against voltage spikes and power surges.
- **Battery Backup** : Integrated battery backup options ensure continuous operation during power outages, maintaining security at all times.
- **Energy Efficient** : Designed for energy efficiency, reducing overall power consumption and operational costs.

Model	SMT-PS7012
Input Voltage	100-240VAC, 50/60Hz
Output Voltage	12VDC
Output Current	7 A (Max)
Backup Battery	Supports 7 Ah battery
Operating Temperature	-20°C to 60°C
Time Delay	0-45 seconds (Adjustable)
Protection Features	Overload, short circuit, over voltage & over-temperature protection

Dimensions (mm)
